

GA6100 Pedestrian Gates

SPECIFICATION

Maximum Span

2.0m

Construction

100mm x 100mm box section frame (posts), 50mm x 50mm box section frame (leaf)

Posts

100m x 100m (if separate)

Safety

Cat 3 edges as standard with dual photocells & a flashing beacon/sounder.

Cycles

High intensity use

Wrap Around Hinges

This hinge solution minimises closing up of the gate leaf towards the gate post to mitigate against trapping hazards. Integrated gate closer can also be specified - a neater solution than typical gas struts.

Gate Infills

Vertical tube is standard but palisade, weldmesh & composite wood is available.

Maximum Height

3.5m

Opening/Closing Time

10 - 18 seconds depending upon operator type

Drives

Mechanical ram or underground motor and gearbox.

Power Supply

230VAC, 50Hz, 16amp

Integration

Our products are bespoke - so there is the possibility to integrate with other products are endless.

Locks

Manually operated gates are supplied as standard with a slip latch for padlocking, but a magnetic lock and self-closer can be supplied. Alternatively a range of panic hardware can also be installed.
