

# GA6500i Bi-Folding Gate

## SPECIFICATION

### Maximum Span

10.0m

### Drive System

3 phase (inverter driven) motor and wormed gearbox mounted inside the posts. It has a lockable door that allows easy access for manual over ride.

### Safety

6 x Cat 3 edges, dual height photocells, Emergency Stop button and a flashing beacon/sounder.

### Bi-Folding Linkage

Linkage allows the smooth folding of both gate leaves, and provides high speed of operation. Leaves retract fully behind the gate post for maximum vehicle clearance.

### Gate Design

Wide range of gate infills are available, from the standard vertical tube, to weldmesh, palisade and timber cladding. We can even provide sheet steel with your logo cut out by water jet.

### Maximum Height

3.5m (dependent upon span)

### Opening/Closing Time

10 seconds

### Power Supply

230VAC, 50Hz, 16amp

### Feig Control Panel

Bi-folding gates feature a Feig Controller that has a built in inverter.
